PSYCHOANALYTIC
INSTITUTE

TREATMENT CENTER

Post-Graduate **Part-Time** Psychoanalytic Fellowship

Certificate in Psychoanalytic Psychotherapy Upon Completion

The Chicago Psychoanalytic Institute Treatment Center invites you to apply for our two-year part-time Fellowship training program in psychoanalytic psychotherapy. It is designed for those early and mid-career clinicians who wish to study and practice depth psychotherapy with adults using psychoanalytic principles. The Fellowship has both a practice and an education component.

— PRACTICE COMPONENT —

This component will fall under the Treatment Center. Fellows will carry a caseload of six-eight clinical hours with psychotherapy patients and will meet weekly in a group with a Treatment Center supervisor who will oversee all their patients. Every effort will be made to refer patients who are appropriate for multiple times a week treatment. Within the practice component, Fellows will be responsible for managing their own caseload, including scheduling, billing and documentation. Fellows who successfully complete the Fellowship, if licensed or secure appropriate supervision, may take their patients to a private or group practice.

— EDUCATION COMPONENT —

All aspects of this component are taught by faculty analysts in the Psychoanalytic Education Program. Fellows will meet weekly, individually with a psychoanalyst consultant to discuss a few cases in detail and aspects of relevant psychoanalytic theory, meet weekly as a group for ongoing Case Consultation, lead by an analyst and take a weekly, yearlong course on clinical technique and process.
